Best Practice during the session 2018-19

Practice-I

Title of the Practice: Tree Plantation Programme

Objective of the Practice

The main Objective of the Practice was to provide eco-friendly environment in premises and pollution free campus. The NSS Unit organised the Tree Plantation Programme in every year. Tree Plantation helps to provide the Green landscaping in huge area of our premises. It also beneficial for pollution free campus.

The Context:

As many students learning in the college premises, fresh air is needed for Good health. It definitely helpful for better environment in our college premises.

The Practice

- Tree Plantation Programme undertaken by the NSS Department every year during the monsoon season.
- Various types of big and small plants planted in different area.
- In 2018-19 the total expenditure about the Tree plantation programme was Rs 1800/-.
- The Tree plantation needs regular care for watering of plants.

Evidence of success:

There are hundreds of big and large Neem, Ashoka, Banyan trees etc., are growing well in our premises. Many flower plants spreads colours and pleasant fragrances, it makes very beautiful scenes in our premises.

Problems encountered and Resource required:

In Summer season due to sunny days' plants needs more water to survive therefore the ground water pumps arranged for watering the plants and trees.

Practice-II

Title of the Practice: Cleanliness Programme

Objectives of the Practice:

The main objective of the practice to keep the 'clean and green' college campus and plastic free campus. The NSS Unit is organised Cleanliness Programme in every year basis on various occasions such as Republic Day, Independence Day, Marathwada Mukti Sangram Day etc. This programme provides awareness among students about cleanliness practice and they taught to treat environment as their friend. The main aim of this practice is to aware the students regarding the conservation of nature and our responsibility to keep clean and save environment.

The Context:

In the recent time, is being rapidly destroyed by the man made things. Therefore, it is immensely important to clean our environment and make plastic free campus to preserve the nature in all possible ways. As many students learning in college premises, this is humble attempt to aware the student about the importance of nature through cleanliness practice.

The Practice:

- Cleanliness programme undertaken by the NSS Department every year on various occasions such as Republic Day, Independence Day, Marathwada Mukti Sngam Day etc.
- Various kinds of unused materials and tree waste clean every year.
- In 2018-19, the total expenditure about the Cleanliness Programme was Rs. 5,260/-.
- It keeps college campus clean and plastic free on regular basis.

Evidence of Success:

There are hundreds of big and large Neem, Ashoka, Banyan Trees etc., are growing well in our premises therefore tree waste materials keep on clean regularly. Many flowering plants spreads colours and pleasant fragrances, it makes very beautiful scenes in our premises. Holding awareness camp on conservation nature from various occasions.

Problems encountered and Resource required

In summer season due to sunny days' plants destroyed and organic waste increased it needs more water to survive therefore the ground water pumps arranged for watering the plants and trees. Our college is situated in flood prone are therefore various plants destroyed by the flood water.
